

Thank you from the Eco-committee.

Last Friday, the Eco-committee ran some very successful food stalls after school. People donated home grown produce, home baked goodies and we even had fresh eggs from home-reared chickens! Thank you to all who donated and bought from the stalls. We raised an amazing £197.80 to go towards our solar panel fund. The best part was the lack of rubbish afterwards – no plastic or food waste!

Seed gathering Session

The Eco-committee have also been busy this week finding out how Leeds County Council Parks and Countryside are developing a 'Northern Forest'. The rangers took us on a walk to gather seeds and learn about our local trees. The seeds will be grown into saplings at the Atrium in Leeds and planted in areas around Leeds during this growing season. It was an informative afternoon, and we were pleased to be part of the council's tree-planting project. Look out for information on our own tree planting project soon!
