

The questions were:

- Did you enjoy science week?
- What was the most fun? How would you describe it?
- Do you enjoy science generally at school?
- Is it challenging?
- What is the best thing about it?
- What could be improved?

YEAR	SCIENCE WEEK	GENERAL
1	Beech: <ul style="list-style-type: none"> • We did what melted ice the quickest and I loved it! • I liked putting my hand in the cold water and splashing it. • We learnt how the sea has millions and trillions of salt in it. 	Beech: <ul style="list-style-type: none"> • I really like science – this week we are recognising what animals are carnivores, herbivores and omnivores and I am doing the Star-nosed Mole. It can eat most everything really.
2	Willow: <ul style="list-style-type: none"> • We were seeing what the ocean is like when it gets rubbish in it and we found out that it changes colour. • I liked tasting the sea. 	Willow: <ul style="list-style-type: none"> • Its not my favourite subject
3	Oak: <ul style="list-style-type: none"> • We made a bug hotel – it was fun to make something • We saw something about light but it was boring as it was too hard. 	Oak: <ul style="list-style-type: none"> • We usually rarely do science except when Science Week came up and then we did it all the time. • Its fun to do something practical.
3	Rowan: <ul style="list-style-type: none"> • Making the helicopters was fun because you got to see how it spun. • Floating a paperclip was fun even though it didn't work! • I liked the pepper on the water experiment – it kept moving when you put your finger in. 	Rowan: <ul style="list-style-type: none"> • I like finding out about plants and living things – researching using the internet. • I like it because it is really fun – all other lessons you have to write but science is the more fun stuff. • Science can be a little bit hard sometimes. • We usually do a written connect task.
4	Hazel: <ul style="list-style-type: none"> • It was the most fun when we did electricity and light on zoom – watching the machine called, 'The Beast'. 	Hazel: <ul style="list-style-type: none"> • Sometimes it is not a s fun when we are writing but when it is experiments it is more fun.

	<ul style="list-style-type: none"> • I really liked to see what happened with our teeth where we used an egg, which is like our enamel, and put it in different liquids. • We did much more science last week. 	<ul style="list-style-type: none"> • Normally I don't like science but it is more fun when we are experimenting. • It is really good and fun because we do experiments and see what happens to things. • Science is much harder when we have to memorise things on a power point but easier when we do practical things. • A lot of the time I understand the demonstrates but we talk through things that we don't understand.
4	<p>Chestnut:</p> <ul style="list-style-type: none"> • I really enjoyed the man with his hair sticking up when he touched a ball! (Static electricity) • I liked when we learnt about sound and you could see the waves. • I liked when we learnt about electricity and there was lightning – it was really cool! • I also liked when we learnt about water treatment and what not to put down the toilet. The worst thing is cotton buds. • I liked putting eggs in vinegar and coke and water – we could see what they did to our teeth. • We got to learn good things every day. • It was fun to see what can affect our teeth. • We made model guts with villi! 	<p>Chestnut:</p> <ul style="list-style-type: none"> • I enjoyed making simple circuits with lamps and things. • I thought learning about solids and liquids and gases was good. • I think some of the demonstrate questions are hard and I find explaining about what has happened difficult. • It is good to listen because when you are in your job you will know how to do it right.
5	<p>Maple:</p> <ul style="list-style-type: none"> • It was fun because we hadn't done the experiments before. • It was unbelievable to see a chemical reaction! • It was fun to see if we could make a lava lamp. 	<p>Maple:</p> <ul style="list-style-type: none"> • Science is fun because you get to learn about things like chemical reactions and how things work in the world like why there is gravity. • It's good because you get to know what things there are in nature which you wouldn't otherwise and learning things about creation. • I think it would be good if we had a specific area for science and more room for displaying what we have found out. • I would like to have more say in what experiments we do. • I think the demonstrates are sometimes too easy.
