

Facts about COP 26

Today I learnt about Cop 26. one thing we spoke about

was reduce, reuse, recycle. Things that can be recycled are cars,

paper and cardboard. This helps to stop global warming. If we do

nothing to try and stop climate change then the sea will rise ~~to~~

1.50m by 2050. This could cause floods. At home we try to do

our best to help, we have a green bin for only recyclable things

and try not to waste paper.
